

Concerned about the dredging?

Many thought that the government would never pass it!

WHAT CAN YOU DO?

The input of every concerned person is needed to create a groundswell!

- Write letter to or email Politicians

Minister for Environment Heritage and the Arts
The Hon. Peter Garrett
Parliament House
Canberra ACT2600
Peter.Garrett.MP@aph.gov.au

Minister for Climate Change and Water
Senator Penny Wong
info@pennywong.com.au

The Treasurer
The Hon. Wayne Swan
Wayne.Swan.MP@aph.gov.au

The Prime Minister
The Hon. Kevin Rudd
(To contact the Prime Minister please go to www.pm.gov.au & use the contact the Prime Minister facility)

Your local Members of both State and Federal Parliament.

SOME DREDGING FACTS

- **Up to 48 million tonnes** of sand and silt habitat dredged from the sea bed and Yarra and dumped off Mt Martha/Mornington (7.5 sq km) and SW of Brighton (some highly toxic spoil from the Yarra)
- **Death of seabed floor** by smothering, leading to risk of:
- **Toxic algalblooms:** Pea green water, stinky corners
- **Drastically compromised water quality**
- **At least 2 years duration** - up to 24 hours a day, 7 days a week - noise, lights etc
- **Dredging releases toxicants:** Pesticides, insecticides and industrial contaminants (mercury, lead, zinc, arsenic, ammonia, cadmium) trapped in Yarra silt
- **Drastic effects on Bay related businesses**
- Price Waterhouse Coopers forecast **container trade will quadruple by 2030** regardless of whether channel deepening proceeds
- **There are alternative solutions.**

See Bluewedges website for expansion of and more facts.
